MSc. Tourism & Events Management

This programme provides conceptual, theoretical, managerial and practical understanding and knowledge in the area of tourism and events management.

2017-2018
The aim of this programme is to provide conceptual, theoretical, managerial and practical understanding and knowledge in the area of tourism and events management, and to develop a graduate who has the tools and competencies to leverage various types of events to deliver the socio-economic benefits of tourism.

The programme recognizes that there is a thrust in many Caribbean destinations to diversify their product beyond sun, sea and sand and many destinations have identified a number of events including conferences, sporting, culinary, beauty pageants, epicurean, heritage, etc. as a mechanism by which to do so.

On completion of this programme, students can elect to be entrepreneurs or choose from a range of employment opportunities in event and festival management operations, conference and exhibition centres, the events departments of hotels, visitor attractions, national tourist boards, local government and other organisations where knowledge of event management is important.

Objectives

The programme aims to:

- To generate the level of intellectual and academic qualities required to expand the boundaries of knowledge in tourism and sport management;
- To extend the breadth of tourism-related education and knowledge in the Caribbean;
- To develop the qualities and transferable skills including initiative, strategic focus, decision-making and independent learning ability necessary for today’s complex tourism environment
- To enable students to go beyond ‘how to do events’ and to think strategically about these activities.
- To provide a sound understanding and critical awareness of contemporary tourism and events issues.
- To position students to assume leadership roles in any tourism and/or sport related organization.

Duration

The programme can be completed in 18 months of full-time study or 24 months of part-time study. A full-time student will be allowed a maximum of 24 months to complete the programme and a part-time student will be allowed a maximum of 48 months.

Programme Structure /Course of Study

Students are required to gain 42 credits through successful completion of 8 compulsory and 4 elective courses (3 credits each) and a final project (6 credits). Some courses will have an Action Learning component which will enable the student to link theories and concepts to industry practices. Classes are held during the traditional semesters and sessions are also held during the summer period. Some courses are semester-long while other courses are conducted in intensive two to three week periods. At the end of the taught component of the programme, students may choose to do a Research Paper or an Internship with an Applied Research Project.

Entry Requirements

To qualify for entry to this programme, applicants should normally have at least a Second Class Honours degree or its equivalent. Candidates with Pass Degrees who have other relevant qualifications and substantial experience will be considered for entry on a case-by case basis.
Internship with Applied Research Project

Students selecting the Internship with Applied Research Project will be required to undertake a three-month internship and submit a paper documenting their experience and relating it to material covered throughout the core programme. The report must be underpinned by sound theoretical and conceptual ideas taught throughout the course and must therefore demonstrate strong and relevant links between theory and industry practice(s). Students with little work experience in the industry should be encouraged to take this option.

Research Paper

Students selecting the Research Paper will independently study an area of their interest in tourism or hospitality management. Students will be given guidance throughout the stages of the research process and produce a research paper presentation of their topic. The student will develop an appropriate research programme incorporating empirical data gathering as well as a literature review highlighting the development of theory/conceptual frameworks. The final research paper must include a literature review, methodology, results, discussion, conclusions, bibliographies and appendices.
